

SPAYING AND NEUTERING

Did you know spaying and neutering does more than prevent unwanted pregnancies? Spaying and neutering your pets can protect them from certain types of cancer, behavioral issues, and other health complications in the future. The recommended timing for spaying and neutering can vary from patient to patient, and our doctors would love to help you make that decision for your pets. We offer spay and neuter appointments weekly with top of the line anesthetic monitoring throughout to keep your pets safe. Call us today to schedule!

PATIENT SPOTLIGHT

»»» **Dusty**

Meet Dusty! Dusty is an adorable, fun-loving Dachshund with a personality as big as his cone! Despite that look of disappointment, Dusty did wonderfully for his recent neuter and is back to running and playing with his Beagle sister, Daisy. Dusty always brightens up our day when he comes in, so we couldn't think of a better patient spotlight!

This month, we have an extra spotlight because Jacob wants YOU to know how early detection bloodwork saved his life. With his yearly bloodwork, Jacob had a single elevated liver value leading our doctors to discover a tumor. Because it was caught early, Jacob had a successful surgery to remove the entire tumor just in time for the arrival of his new human brother! Thanks to EDB, Jacob is cancer-free!

SURVIVOR SPOTLIGHT

STAFF SPOTLIGHT

»»» **Dr. Sydney**

This month's staff spotlight is a face we all know and love, Dr. Sydney! When out of the office, Dr. Sydney enjoys spending time outdoors, listening to live music, and travelling. Later this month, Dr. Sydney is getting married, and we couldn't be more excited for her! Next time you drop in, be sure to give her your well-wishes for her wedding day.

»»» NATIONAL DISASTER PREPAREDNESS MONTH

It's no surprise that September is National Disaster Preparedness Month. We want to help you make sure your furry family members are just as prepared as you are! The best way to protect your pets in case of evacuation is to have easy access to their medical records, ensure they are microchipped, and make sure their rabies tag is up to date. Make sure you are on our Pet Portal for the quickest access to your pets' records, in one, convenient location. Not sure what that means? Call us today and we will help you get set up!
